

PATTERNS

PTSD AND AUD TRAJECTORIES

In this study, we aim to understand pathways between PTSD and Alcohol Use Disorder (AUD) to help inform treatment and better understand who is most at risk.

PATHWAYS OF RISK MAY DIFFER BY SEX OR GENDER

WOMEN HAVE HIGHER RATES OF PTSD

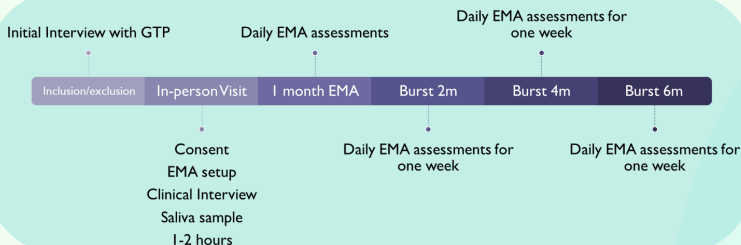

MEN HAVE HIGHER RATES OF ALCOHOL USE DISORDER

STUDY METHODS

- **Clinical Interview to assess symptoms**
- **Ecological Momentary Assessment (EMA) via phone to understand how changes in PTSD symptoms and alcohol use relate each day**
- **Saliva collected to examine DNA to understand genetic risk**
